Student Learning Outcomes

College: Computing and Informatics
Department: Computer Science
Degree Program: Bachelor of Science in Computer Science

1) Students will demonstrate competence in programming skills.

2) Students will demonstrate fundamental knowledge of data structures and algorithms.

3) Students will demonstrate an ability to analyze a problem, identify and define the computing requirements appropriate to its solution, and develop an efficient software solution for the problem.

4) Students will demonstrate acceptable teamwork skills.

5) Students will demonstrate acceptable oral communications skills.

6) Students will demonstrate acceptable written communications skills.

7) Students will demonstrate knowledge of professional and ethical responsibilities.
