PROGRAM REQUIREMENTS

The Department of Physics and Optical Science offers the following degrees: B.A. in Physics, B.S. in Physics. The B.A. degree is intended for students who are interested in double majoring in physics and another discipline or who plan to teach physics in high school. The B.S. degrees are intended for students interested in working in a technical industry or attending graduate school in physics or a related field. All of the degrees in physics are very structured – one class builds on another. Students should declare the major in the freshman or early in the sophomore year so that all required classes can be completed in 4 years.

Areas	Credit Hours	Description
Pre-Major/ Prerequisites	-	
Major	36-51	Some of the required courses in the major will count towards University General Education requirements for Natural Sciences, Oral Communications and Writing Intensive courses.
General Education <i>(not satisfied by other major requirements)</i>	21-24	These hours do not include those requirements which are satisfied within the major. Students with an associate's degree are exempt from most General Education requirements.
Related Work	16	Courses that are required pre-requisites for PHYS courses taken by all majors. These include CHEM and MATH courses.
Foreign Language	0-8	Students must demonstrate competence at the 1202 level. Competence can be demonstrated by transfer courses, placement exam, or courses at UNC Charlotte.
Electives	24-36	As needed to complete 120 hours total.
Total Credit Hours	120
