

Student Learning Outcomes

College: Education

Department: Middle, Secondary, and K-12 Education

Degree Program: PhD in Curriculum and Instruction

- 1) Ph.D. students in the Curriculum & Instruction Doctoral Program will demonstrate in-depth knowledge of core urban education topics, research, and the content in their chosen area of specialization (urban education, reading, ELL, English education, mathematics, or elementary education).
- 2) Ph.D. students in the Curriculum & Instruction Doctoral Program will demonstrate an understanding of the experiences of a group other than their own, and will demonstrate an understanding of the implications of those differences for education.
- 3) Ph.D. students in the C&I doctoral program will demonstrate the ability to conduct independent research to answer relevant questions in their area of specialization. This research does not typically involve PK-12 learners, but has the potential to add to the body of knowledge in the field of education.
