

Student Learning Outcomes

College: Liberal Arts & Sciences

Department: Chemistry

Degree Program: Bachelor of Science in Chemistry

- 1) Make accurate quantitative chemical measurements in the laboratory.
 - 2) Demonstrate the ability to apply knowledge of organic chemistry.
 - 3) Demonstrate the ability to apply knowledge of physical chemistry.
 - 4) Demonstrate the ability to apply knowledge of inorganic chemistry.
 - 5) Demonstrate the ability to communicate scientific information effectively in oral format.
 - 6) Demonstrate the ability to communicate scientific information effectively in writing.
-

Degree Program: Bachelor of Science in Chemistry with Biochemistry Option

- 1) Make accurate quantitative chemical measurements in the laboratory.
- 2) Demonstrate the ability to apply knowledge of organic chemistry.
- 3) Demonstrate the ability to apply knowledge of physical chemistry.
- 4) Demonstrate the ability to apply knowledge of biochemistry.
- 5) Demonstrate the ability to communicate scientific information effectively in oral format.
- 6) Demonstrate the ability to communicate scientific information effectively in writing.
